Leader: Grant Carr

Action List

- Create sequence diagrams for HFD
  - Identify most important use cases
  - Ensure alignment with Domain Model and customer requirements
  - Diagram flow of program for each use case
  - Write detailed descriptions to accompany each diagram

Summary

- Sequence Diagram
  - Important use cases to define were identified
  - Key models were identified and diagrammed
  - Flow of information through operations was identified and diagrammed
  - Areas where necessary operations hadn't been identified on the domain model were identified
- Domain Model Update
  - More operations were identified
  - A vehicle control system was defined to provide more detail
  - New connections were defined in the warning system and driver interaction system
